Paul:

Wanted to say thanks to you and the rest of the SMG crew for a job well done at CBX.

The four conference rooms you worked on here are now finally useable thanks to the ceiling clouds that SMG designed and installed. I have personally received many compliments on the improvement in the quality of our conference calls.

The positive impact of these acoustic treatments on our client relationships should not be underestimated, and I would recommend SMG to anyone wanting to make sure their rooms help put their best impression forward.

Sincerely,

Thom Unterburger  
Director of Technology
